

OLUWATOBILOBA OLATUNJI

SOFTWARE ENGINEERING SCHOLARSHIP APPLICANT | COMPUTER ENGINEERING UNDERGRADUATE

Lagos, Nigeria | +234 906 682 1711 | olatunjitobiloba05@gmail.com

Portfolio: olatunjitobiloba.vercel.app | GitHub: github.com/olatunjitobiloba | LinkedIn: linkedin.com/in/olatunji-oluwatobiloba-186659291

PROFESSIONAL SUMMARY

Nigerian Computer Engineering undergraduate and early-stage software engineer with a 4.86/5.00 CGPA and hands-on experience building and deploying Python APIs, AI-enabled applications, event platforms and embedded systems. Demonstrated initiative through live projects, 49 automated tests, approximately 83% test coverage and multidisciplinary team leadership. Seeking the Cardtonic Upskill 4.0 Software Engineering scholarship to strengthen full-stack foundations, engineering judgement, testing, deployment and responsible AI-assisted product development through structured AltSchool training.

EDUCATION

B.Eng. Computer Engineering | Covenant University, Ota, Nigeria | 2023 - 2028

CGPA: 4.86/5.00 | Focus areas: Software Engineering, AI/ML, backend systems and embedded intelligence

TECHNICAL SKILLS

Programming & backend: Python, FastAPI, Flask, REST APIs

Engineering tools: Git, GitHub, Docker, pytest, automated testing, API deployment and technical documentation

AI, data & hardware: scikit-learn, data analysis, machine-learning fundamentals, microcontrollers and sensor integration

SELECTED SOFTWARE & ENGINEERING PROJECTS

- **FocusPilot** - Built an AI-powered productivity system combining a Chrome extension, FastAPI backend, behavioural analytics and a four-factor distraction scorer; delivered 49 automated tests across the stack. [Live application](#)
- **Loan Prediction API** - Developed and deployed a Python/Flask REST API comparing four machine-learning models; achieved 88.62% accuracy and approximately 83% test coverage, then documented the engineering process in a 3,000-word technical article. [Live application](#)
- **Heroes Conference '26 Raffle Platform** - Built and deployed a live event system with separate audience and protected administrator experiences, real-time polling and animated raffle updates. [Live application](#)
- **IoT Vehicle Speed Detector** - Co-developed a microcontroller system using paired IR sensors to calculate speed and trigger LCD/alarm warnings; placed second in an IoT competition. [GitHub repository](#)

EXPERIENCE

Information Technology Intern | Union Bank of Nigeria Plc., Head Office | Aug 2026 - Present

Selected for a two-month placement in the Information Technology Department, gaining exposure to enterprise technology operations and the application of computing knowledge in a professional environment.

LEADERSHIP, SERVICE & RECOGNITION

- **Graphics Head, Covenant University Technical Crew (Sep 2025 - Jul 2026)** - Led high-pressure visual production for major programmes, trained team members and documented operating standards for leadership continuity.
- **In-Charge, 100 & 200 Level, Covenant University Technical Crew (Sep 2024 - Jul 2025)** - Coordinated and mentored 150+ students, onboarded 50+ new members and created a 16-step development framework.
- **Recognition** - Second Place, IoT Speed Detection Competition; Hackathon Team Lead across 3+ multidisciplinary product builds.
